Yamada Manufacturing Co., Ltd.

J.K. Fenner (India) Limited

Announce Strategic Relationship with J.K.Fenner(India)Limited

Yamada Manufacturing Co., Ltd. established a strategic relationship with J.K. Fenner (India) Limited (Headquarters: Chennai, Tamil Nadu, India, hereinafter referred to as “JK Fenner”).

JK Fenner is a diversified automotive component supplier in India with strong capabilities in the design, development, and manufacturing of high value-added automotive components.

The strategic relationship combines JK Fenner’s strong manufacturing capabilities, engineering expertise, and customer reach with Yamada Manufacturing’s advanced Japanese technology and product development capabilities. The partnership aims to accelerate innovation, enhance product quality, and address the evolving requirements of automotive OEMs, including next-generation mobility solutions.

Through this strategic relationship, the two companies will focus on:

- Technology transfer for advanced automotive component manufacturing.
- Joint product development to meet global quality and performance standards.
- Localization of advanced technology products for the Indian automotive market.
- Enhancing manufacturing processes, quality systems, and engineering capabilities.
- Delivering innovative, reliable, and cost-effective mobility solutions to customers.

Through this strategic relationship, Yamada aims to accelerate its market entry and business expansion in India.

■ About J.K. Fenner (India) Limited
